Deliver A Project

Transforming a Global Wi-Fi Infrastructure

A multinational Insurance Company based across 100 sites throughout North America, Europe, Asia Pac and Middle East wanted to improve their current wireless infrastructure and requested its IT partner to support as part of a wider network upgrade. This partner approached Empowered to undertake a full deployment of the Meraki solution over a 6-month period with breaks in service due to the pandemic. The solution from Empowered has now been fully commissioned into service.

Deliver A Project

Windows 10 Migration Project

A large London Borough Council engaged Empowered via their IT partner to deliver a large migration to Windows 10 on all end user devices. The key deliverables were to successfully deploy over 4,000 devices to individual users over multiple sites. Empowered structured the deployment to undertake user device handovers on a 1-2-1 basis with an overall delivery team of 20+ resources including project support and handover / support engineers.

Deliver A Project

DC / Cloud Migration Design & Build

A large public sector organisation had a requirement to relocate all their core business applications from existing to new Data Centres. Empowered was engaged by their IT partner to complete the required logical design, setup and configuration on new storage infrastructure, a new virtualised resilient (VMWARE) environment and to complete the migration of applications from existing to new DC's. Project delivered over 9-month duration with ongoing in life support thereafter.

Deliver A Project

Mass Deployment Roll out

A nationwide logistics organisation with an estate of over 1,500 sites and almost 40,000 vehicles had undertaken a programme to update its PDA estate used by all delivery personnel. In addition, each vehicle required a PDA holder installed in each vehicle. Via its partner, Empowered was engaged to underpin the rapid timescales of the project. Whilst a simple installation, Empowered mobilised its delivery teams and its MyOrderWork platform to successfully complete the project in 12 weeks.

Digitise & Automate Device Roll Out

Network Device Roll Out using MyOrderWork

A wholesale network aggregator had an objective to digitise all their network provisioning away from traditional manual methods onto a single digital system with full transparency, automated communication, and updates throughout the process. Empowered was able to deliver this via its MyOrderWork services platform providing total control of all customer network CPE deployments requests with a consistent delivery journey, fully managed and reported via the platform.
